

Our capabilities include:

CNC tube cutting, CNC machining, CNC Tube bending, Automated Orbital TIG welding, ASME Pressure Code Welding, Tee forming, Helium Vacuum leak detection, Ultra Sonic Cleaning with Deionized water and Nitrogen purge vacuum sealing with most of our manufacturing done in a clean room environment. We can handle tube sizes ranging from 1/8" (3mm) to 6" (150mm).

ISO Compliant

All of Our processes are documented and comply with [ISO 9002](#) standards. We also have process controls on all of our chemicals and equipment.

AWS Members

Our main technology is of Application Microelectronics and allied services. We are helping to address the

[Mechanical Engineering Services](#) Integrated Manufacturing Technologies is to achieve total Customer Satisfaction through

[Engineering Services](#) design assistance and complete layout design services, offering a wide range of
